

## **Software Developer**

- Do you want to join a growing company with a unique culture?
- Are you positive and pro-active with a passion for software development?
- Do you enjoy building technical products for technical people?

We're looking for a motivated and enthusiastic individual to join our talented software development team. We need someone who is passionate about developing great software, has a talent for problem solving and loves technology. As a Software Developer you'll find yourself covering all aspects of our Agile software development lifecycle and of course you'll be elbow deep in code.

### **About us**

Based in Southampton, Snowflake Software is a fast growing award winning software company. We have a very open culture here at Snowflake where we all pitch in and support each other. As part of the team you get to see the complete business and contribute within every part of it. We're big fans of Agile practices and use it extensively (with all the latest tools) to deliver first rate software products.

Snowflake is transforming the aviation data market with its software solutions and cloud platform allowing flagship brands such as NATS, EUROCONTROL, Air Services Australia and the FAA to rapidly exchange massive amounts of complex aviation data with their customers and stakeholders. It's an exciting time for us at Snowflake and a great time to join our expanding team where you'll have the opportunity to make a real difference to a growing and exciting area of the business.

### **What the role is all about**

As a Software Developer, you will be involved in the full lifecycle of development from design and implementation, to testing and deploying enhancements for our software products. Working within one of our delivery teams you'll be developing new functionality, addressing technical debt and resolving defects as you build our products, platforms and systems. You'll get to take part in leading edge projects across the industry and as part of our commitment to continuous improvement every now and again you get to take part in one of our 'Pet Project' days; code what you like for the day, share what you've done in our end of day show 'n' tell and consume pizza whilst you're at it!

### **You'd be a perfect fit if:**

- You are degree qualified (min 2:1) including a significant element of software development or engineering
- You have at least 3 years of commercial experience
- You have experience of Java programming
- You have experience in the other key programming languages and technologies in use at Snowflake Software. These include :
  - o Amazon, Google and other cloud platforms
  - o Web Services, JSON and XML
  - o Java frameworks such as Spring
  - o Unit and behaviour testing frameworks
  - o Relational Database Management Systems
- You have knowledge of software engineering process and practice including:
  - o Object Oriented software design
  - o Event based and microservice architectures
  - o Software development processes
  - o Agile development

### **We'd like you to be:**

- Collaborative, appreciating the need for collaboration in order to develop and deliver the most robust and effective business solutions

- Creative and good at problem solving
- Positive and pro-active with an enthusiasm for technology and willingness to embrace new skills
- Have a drive to deliver with an eye to both quality and deadlines
- Part of the Snowflake team and its culture. We don't want you to just get your head down and work hard, we want you to engage with the rest of the team too which should help you to be...
- Passionate about your role and working for Snowflake. We want you to enjoy your time with us as a Snowflaker!

### **Rewarding you**

If you think you would enjoy the challenge of working in an environment where hard work is recognised and rewarded with a competitive salary package including annual bonus, contributory pension scheme, 25 days holiday and flexible working, send us your CV with a covering letter to [jobs@snowflakesoftware.com](mailto:jobs@snowflakesoftware.com) stating what your experience and skills would add to the Snowflake team. To see a full job description visit our website [www.snowflakesoftware.com/jobs/](http://www.snowflakesoftware.com/jobs/)

### **STRICTLY NO AGENCIES**

**Applicants must be eligible to work in the UK**
